UP 7

Sunón

UP7 Intelligent master of Multi-task

The digital workstation will overturn the human-facility interaction in the office space. UP7, with intelligent sensing technology and LoRa-based data transmission technology, empowers the aesthetics of space, the health of employees, and the efficiency of administration management.

Side by side with the innovators, it accompanies you to climb up to the peak with advanced intelligent technology. Users can choose freely from sitting to standing. The easy sit-to-stand switch helps relax the tired body for multitasks; between a push and pull, the enlarged storage space accommodates individual and working items, leaving a cleanly managed tabletop for higher concentration.

**Awakening the Senses with Beauty
embedded in the shape**

Implementing the beauty of round shapes, the desktop, desk legs and hand controls are all presented in a rounded arc shape, adding a touch of warmth and softness to the space; the skin-friendly desktop with skin-sensitive painting makes every touch of the body more comfortable, thus creating an extraordinary tactile experience. The ubiquitous humanized design completely awakens the passion for work in the office.

Perception to wisdom Response to inspiration

Breaking the monitoring limit with superb sensing technology. Sitting postures, body temperature, and even heartbeat rate can be monitored with intelligent reminders to help maintain a healthy using habits. These reminders are triggered based on real behaviors, improving the health at office with intelligent upgrades.

- Combination of three major sensing elements
- Precisely separating human body and the environment
- Being able to identify the human body at the condition of rest
- No image acquisition, no invasion of privacy
- <10mA ultra-low power consumption, energy saving and environmental protection

Three Steps to Healthy Work

Step 1

During daily office work, the green light is on, caring for health without risk.

30-60mins
Sedentary reminder

Step 2

The 30-60 minutes setting of long-time setting guarantees that a warning reminder is triggered when the time limit is exceeded. Red light flashing and the slight vibration of the desktop give you two flexible alert settings.

Step 3

Pressing to lift to the set height, healthy working can be simply obtained.

The display area adopts OLED high-definition digital display screen, 360° visible without distortion; the touch area is a capacitive touch screen with sensing accuracy of up to 99%, making the operation clear at a glance and the response extremely fast and sensitive.

One-touch to adjust standing height (preference)

Up

Down

One-touch reset (to 750mm)

Network instructions, white light is connected, red light is off-line.

One-touch to adjust sitting height (preference)

Setting / OK button

Leading the way Releasing "wire-free" space

The leading level of line management capability, with extra-wide line slots, achieves a super line overload up to 16 workplaces. With the use of serpentine tube and the bottom-up hidden alignment, there's no line interference but more spacious space under the desk.

The integrated flip-top desk box provides a temporary power supply module. Plug and unplug at you will, always full of power.

Narrow spaces can also be handled with ease. The single desk configuration fits closely to the wall and extends to make the best use of every inch of space.

Going beyond, Boundaryless of space

The leading level of line management capability, with extra-wide line slots, achieves a super line overload up to 8 workplaces. With the use of serpentine tube and the bottom-up hidden alignment, there's no line interference but more spacious space under the desk.

All data is on Back-stage management

Through LoRa IOT technology, digital workplaces are connected to the backstage, and multi-dimensional data analysis makes asset evaluation and logistics management easy for enterprises. Within one screen, you can see the workstation utilization situation at a glance, thus realizing the simultaneous optimization of operation and maintenance costs, space utilization efficiency and employee health management.
