MT SERIES

Sunon

**EMPOWER MEETING
AND COMMUNICATION**

FLAGSHIP MEETING COLLECTION FOR 0-BOUNDARY COMMUNICATION

Efficiency is one of the priorities in the boardroom. MT, with a minimalistic style and a variety of specifications, can satisfy needs of different types of enterprises and space. In a meeting shaped by MT, the team fulfills tasks like members of a battleship. The exchange of ideas becomes an efficient experience.

Geometrical C-shaped Feet

The geometrical cutting of the lower feet makes the cut surface have different visual effects when viewed from different angles, which is light while having excellent load-bearing performance.

541mm Concave Design, Larger Knee Space

The art of origami is integrated into the design of the leg to form an inward tilting angle, which echoes with the 30° bevel cut of the tabletop. Members seated at both ends can enjoy a large knee space of 541mm. When legs are free, users can focus on the discussion.

Well-organized Wiring, 0-interference Communication

The wiring is hidden in the lower feet, clean and neat, and does not affect the knee space. The desktop is functionally partitioned: making VIP reception, team communication, remote video more convenient and efficient.

Enclosed O-shaped Feet

O-shaped table feet, as imposing as a ship riding the ocean waves, makes the overall shape more stable, endowing the meeting with a solemn and orderly atmosphere.

MT series has powerful adaptability featured by small size for group communication or cross-departmental decision-making and large size for organization and management meetings or formal business reception (6 to 30 people).

Minimalist straight line aesthetics

Arc curve for more comfort

Mellow chamfer, safe and collision-proof

Thick and Thin, Curved and Straight

Thin tabletop meets volume feet, while round and soft corners at both ends combine with stiff and straight edges in the middle. The contrasting visual perception is full of ingenuity.

Given that products may be updated constantly, no further notice will be given in regard of changes in specification, and the real product shall be considered as final.
